ABSTRACT

RimauSwap is a **Public Benefit Project (PBP):** A for-profit project intended to produce public benefit and operate in a responsible and sustainable manner. RimauSwap is the first **Public Benefit Project DEX for the** community and it operates on the Binance Smart Chain (BSC). The underlying technology is based on PancakeSwap, which has proven to be secure and reliable. The main driving factor of RimauSwap is the sustainable ESG (Environment, Social and Governance) ecosystem.

As an integral part of the Decentralized Finance (DeFi) ecosystem, Automated Market Maker (AMM) based Decentralized Exchanges (DEXs) have gained massive traction with thriving interest in blockchain and distributed ledger technology in general. The AMM concept initially introduced by Bancor (2017) & Uniswap (2018) has proven viable, allowing a fully on-chain autonomous market-maker to gain exponential adoption in combination with liquidity mining.

To achieve a sustainable localized DEX (Decentralized Exchange) via ESG (Environmental, Social and Governance) programs in the DeFi ecosystem.

In our vision, ESG is not just a useful tool; it is a vital component for the growth and stability of the DEX. While operating a DeFi decentralized exchange (DEX), the revenues generated from it will be used to sustainably fund localized ESG programs; and concurrently deliver value to participants who funded the project through their purchase and holding of the native RIMAU token.

WHAT IS RIMAUSWAP FINANCE?

The First Decentralized Exchange (DEX) for Global Crypto Communities with Sustainable ESG. RimauSwap is also a Public Benefit Project that goes beyond profit and aims to create a sustainable social impact on the needy community.

RimauSwap helps you to maximize your crypto asset value and contribute to the needy community while doing that. You can **Trade**, **Earn and Contribute** with us.

Key differentiations that set us apart from other DEXes are as follows:

- 1. It is the first Public Benefit Project DEX on BSC.
- 2. Sustainability as the key focus of our Environmental, Social and Governance (ESG) ecosystem.
- 3. Targeting of the needy community as beneficiaries of the sustainable ESG ecosystem.

WHY DID WE BUILD RIMAUSWAP FINANCE?

DeFi and yield farming has experienced an exponential boom in popularity, market cap and investors' interest around the world. While we are seeing growing interest in DeFi amongst the world, we also observed that:

- 1. DeFi market is still lacking a sustainable DeFi ecosystem
- 2. There is no DeFi project that focuses on giving back to the society

Everyone seems to be on the bandwagon of unsustainable high APR. It is red sea and unfortunately, many of such DeFi projects do not last. Spotting the gap in the DeFi market, we decided to start the RimauSwap Public Benefit Project that would consequently benefit the needy communities.

WHAT IS \$RIMAU?

RimauSwap's native utility token, the RIMAU token, will perform a crucial role in the functioning of the RimauSwap ecosystem. RIMAU is also the reward token for liquidity provision, through which holders will be able to earn profits generated from trading in RimauSwap farms.

By design, after rewarding liquidity providers with 68% (0.17% of every trade made) of liquidity pool trading fees, 20% (0.05% of every trade made) is used to buy back RIMAU tokens for the purpose of burning, making RIMAU token a deflationary crypto asset and driving its value up in the long run.

In addition to that, revenue from liquidity farms will be extracted over time and pledged for external DeFi yield farming. Most of the profits from this external yield farming is distributed towards creating positive social impact and making the RIMAU token deflationary through more token buyback and burning in an on-going cycle.

To get your hands on the token, head to PancakeSwap decentralized exchange and exchange it for another crypto-coin or token through a liquidity pool.

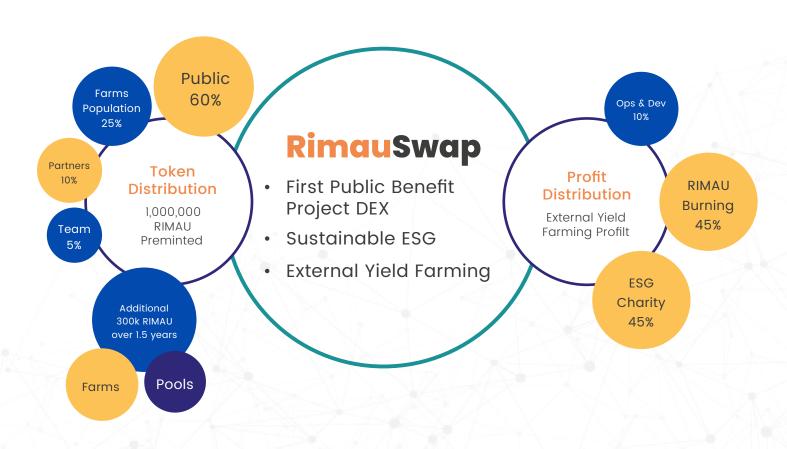

THE BIG PICTURE - SUSTAINABLE ESG ECOSYSTEM

RimauSwap Public Benefit Project is a sustainable ESG ecosystem that focuses on creating positive social impact to the needy community. This is made possible by:

- 1. Channeling 20% trading fee revenue due to RimauSwap DEX towards making the RIMAU token a deflationary crypto asset that appreciates in the long run.
- 2. Pledging revenue extraction from RimauSwap DEX to external DeFi yield farming and channeling the proceeds from this to the sustainable ESG ecosystem.

Below is a brief overview of RimauSwap Public Benefit Project's sustainable ESG ecosystem:

SUSTAINABLE ESG ECOSYSTEM

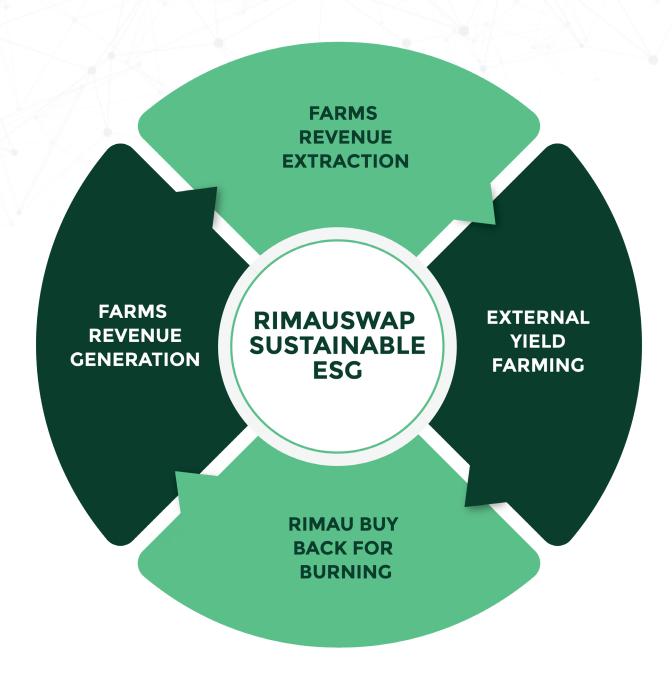

VALUE CREATION CYCLE

ESG refers to Environment, Social and Governance. Sustainable ESG is the core of RimauSwap Public Benefit Project. Here's how:

Over time, revenue from RimauSwap farms is extracted and pledged to external DeFi yield farming. A big portion of the proceeds (45%) from the external yield farming are channeled to charitable bodies, helping to spark positive social impact.

Another big portion of yield farming profits (45%) is allocated to buy RIMAU from the market and burn them, keeping RIMAU token deflationary and driving its value up in the long run. This helps in creating a cycle of value creation that funds initiatives to create positive social impact to the needy community.

In short, RimauSwap is an ecosystem with a sustainable value creation cycle and is therefore, a sustainable ESG. So, by using RimauSwap for your crypto asset trading and yield farming, you are directly contributing to the greater good.

Exchange (Swapping / Trading)

RimauSwap is an Automated Market Maker (AMM) and the Exchange is the heart of RimauSwap. Users can swap or trade tokens and coins directly without having to trust a third-party like Centralized Exchange, and without losing custody of their digital assets. All swaps are performed via DeFi wallets such as Metamask or TrustWallet.

2. Yield Farming

Anyone can be a liquidity provider and earn RIMAU token rewards by supplying liquidity into liquidity pools. RimauSwap has various liquidity pools (farms) with attractive APR (Annual Percentage Rate) returns, that allow anyone with crypto assets to grow them here.

3. Belang Pools

'Stake RIMAU, Earn RIMAU' in attractive APR, plain and simple. Belang Pool staking is the simplest way to grow RIMAU token quantities while holding it and benefitting from its deflationary and long-term potential of value appreciation. Yield Farming

Anyone can be a liquidity provider and earn RIMAU token rewards by supplying liquidity into liquidity pools. RimauSwap has various liquidity pools (farms) with attractive APR (Annual Percentage Rate) returns, that allow anyone with crypto assets to grow them here.

1. RIMAU Supply & Allocation

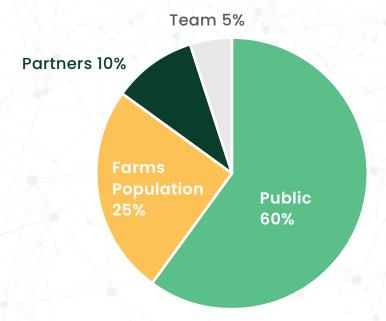

At launch, 1,000,000 RIMAU tokens will be pre-minted, representing 76.9% of the total supply of 1,300,000 RIMAU tokens. The additional 300,000 RIMAU tokens will be minted over a period of 1.5 years. The pre-minted supply will be allocated to Public, Farms, Foundations (Partners & Marketing) and Team respectively. 60% for public sales. 25% for liquidity farms population. 10% for marketing initiatives such as, but not limited to strategic partnerships and foundations. 5% will be allocated for the RimauSwap team and that will be subject to a two-year vesting.

2. Token Information

Token Name	Rimau Token
Token Symbol	RIMAU
Total Supply	1,300,000 (1.3m)
Pre-minted Supply	1,000,000 (1m)
Additional Supply	300,000 (300k) to be released over 1.5 years (18 months)

Rimau Token is a BEP-20 token in the Binance Smart Chain network.

3. Token Distribution

- Public Circulation 60% of tokens will be allocated to PancakeSwap upon our Pre-Launch event
- Farm Population 25% of tokens will be allocated towards farms which will be handled by designated fund managers
- Foundation & Community [For Airdrop, LP Partners, Social Impact, Marketing] 10% of tokens will be reserved for future strategic expenses including listing fees, audits, third-party services, liquidity for partnerships and social impact activities.
- Team 5% of tokens will be used for development and potential team expansions.

4. Trading Fees

0.25% per trade.

- i. 0.17% goes to liquidity providers.
- ii. 0.03% goes to RimauSwap treasury.
- iii. 0.05% goes to RIMAU buyback for burning.

5. RIMAU Sustainable Fund

25% of the tokens will go towards liquidity farms population. Revenue extraction will be done gradually from these farms, and it will be pledged to external funds for yield farming.

45% of the profits from yield farming will be allocated to RimauSwap's ESG initiative to create positive social impact. Charitable bodies will be identified to receive the profits for their respective initiatives.

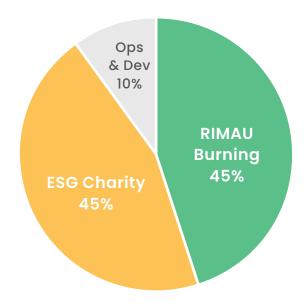

Another 45% will be used for buyback of RIMAU tokens and those tokens are immediately burned after purchase.

In addition to that, 50% of trading fees from exchanges will also be used for buyback of RIMAU tokens which will be sent to be burned. Essentially, this reduces the amount of the tokens in the ecosystem, which results in an increase in price.

At RimauSwap, we have chosen to implement the Buyback concept to make our token more attractive for holding over longer periods of time. The remaining 10% of the profits from yield farming will go towards funding development, innovations and team expansions.

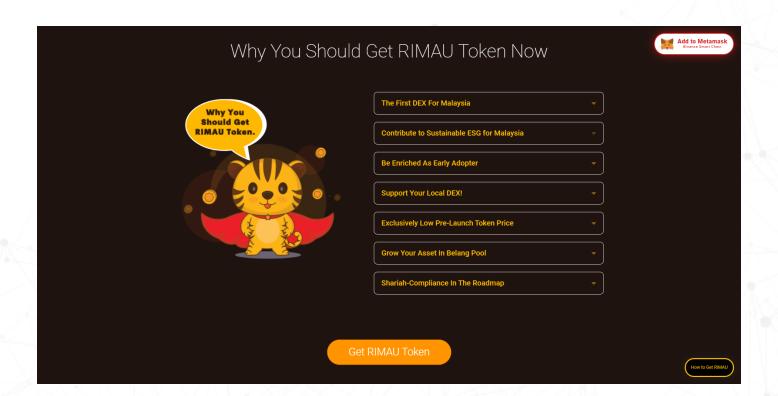

6. Profit Distribution

FARMING PROFIT FROM RIMAU VALUE EXTRACTION

7. Token Sale

Pre-Launch Event is scheduled to commence on 15th August 2021.

1. Q3 2021

- a. Launch DEX Website
- b. Liquidity Pool Farming
- c. Launch Belang Pool
- d. CoinGecko Listing
- e. CoinMarketCap Listing
- f. Grow community and expand the team
- g. Creation of a marketing, growth and operations strategy
 - h. Influencer marketing
 - i. Creation of official whitepaper
 - j. Community contests and giveaways

2. 04 2021

- a. Liquidity Listing on Top 10 DEX
- b. Grow social media and brand
- c. Launch several marketing campaigns
 - d. Launch charity voting web app
 - e. Contract audit
 - f. Influencer collabs and cameos
- g. Strategic partnerships with major investment channels

3. Q1 2022

- a. Forging of corporate partnerships
- b. Additional listing RIMAU on major exchanges
- c. Merchandise release for RIMAU community

4. 02 2022

- a. Exploring other exchanges for bringing new members to the community
 - b. Diversification into real-world use cases
 - c. Launchpad social causes
